

# PROJECT NAME

Pilot Study

November 6, 2016

Marc Coquand, Linus Lagerhjelm, Mattias Cederberg and Simon Asp  
Supervised by Stig Byström  
Umeå University

## Background

Walking home late at night can be a daunting experience. The newspapers write about assaults and harassment, the northern winter climate contribute with shorter days and darker nights. Existing street lights helps with the problem but the feeling of uncertainty and fear persist. *PROJECTNAME* will investigate how a technical solution could be applied to create an increased sense of safety. The project is carried out in collaboration with the municipality of Umeå and Umeå University as part of the courses Interactivity in Smart Environments and Project Management.
